

	Setup				Medication reminders			Mood Tracker		Updates		Book appointment		Generate Reports	
Doing	Introduction & Contacts	Add Health Professionals	Add Medication	Complete Profile	Last medication taken	Medication Reminder Alert	Snooze	Log today's mood	Update medication & Doctor information	Find doctor in the list	Add appointment to calendar	Generate Medication and Blood sugar logs			
Thinking	"I will set this up and then this will be taken care of"	"I hope I have the whole list pf doctors"	"Do I really need to enter the dosage?"	"I can always come back if I gather more information"					"Finding the medication and updating it with the new information is straight forward"	"I don't remember the doctor's name but I can find him by speciality"	"I will set myself a reminder too so I can come with mom, did it sync right?"	"I can send all the reports to the doctors via email, that's a lot of time saved"			
Feeling															
Expectation	Setup will request all the necessary information.	Adding multiple doctors will be intuitive	Denise will be able to answer all the questions	The next step is clear					Updating medication or doctor details should be simple and not buried in menus.	Finding the doctor should not take long	Calendar sync will return a confirmation	Reporting is a simple and quick task
